When You Buy Fertilizer From Us You Get One Mixed for Your Land

No one Fertilizer can give uniform benefit to all classes of land. Because all land is not alike by any means. When a man goes to buy a farm he wants to see what kind of soil is there. You should not think of buying fertilizer without knowing that it is adapted to your soil, and the crop to be grown. The proper Fertilizer is as necessary as the land itself if the grower really wants the most profitable results—and we believe you, as a grower, do want to get from your labor all the crop that can be produced. You should have it.

You are entitled to a substantial profit from your labor. You should have it. We want to help you, and feel sure we can.

First, we need from you a chance. Write us to-day for a free copy of our 1910 Florida Almanac, and give us the number of acres and kind of crops you cultivate. Has the information that ought to be in all reliable almanacs, and Fertilizer facts that are worth studying—and studying before your grove is fertilized or next crop is planted.

Dollars Doubled

The practical service these outfits have given in the hands of the fruit and truck growers is proven by the fact that our customers made large profits this season while their neighbors, who did not irrigate, were not able to mature their crops, and lost money. It will pay you to investigate this, and write for catalog telling you how it is done.

Gentlemen: In response to your inquiry about No. 2 H. P. gasoline engine shipped us in August, we beg to say that we are running it constantly by a belt to a pump of fifty gallons capacity per minute. It is economical, runs easily, makes little noise and is entirely satisfactory. Thanking you for interest in "Blakeslee" by your inquiry, we are,
